

acoustic Design® advanced Integration

Control Everything, now only through your iPad device!

A new application comes from Vantage and transforms your iPad into a perfect, portable touch screen!

Enjoy Something Unique: In terms of customization as well as in terms of cost

A brand new application that can transform your iPad device into a fully mobile touchscreen. Now you gain complete control on your home automation system, no matter where you are!

Simply touch the iPad screen to dim the lights, scroll through your music library or view the front door camera. By connecting via Wi-Fi or via the 3G network, you can set lighting levels, whole-home scenes and room temperatures or adjust volume and view surveillance camera feeds for multiple locations.

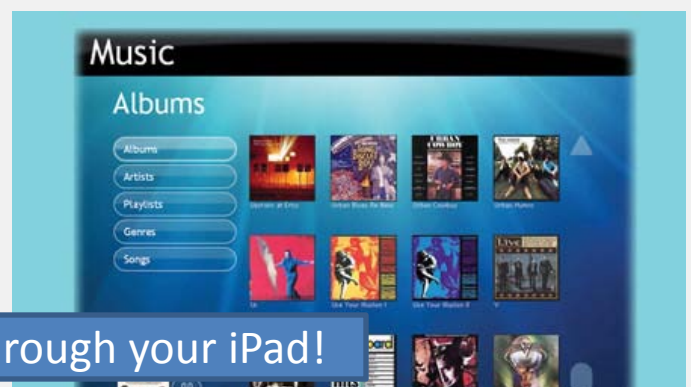

The most amazing feature is that your iPad can be fully customised and will look and function exactly like your already installed Touch Screen. This application gives you complete control, and it does not require any further development or design work by the dealer or installer.

Personalization...

Characteristics:

- **Control multiple homes** from a single iPad Device, **while on the go**, or from the comfort of your home.
- **Works on iPad (in 1x or 2x mode)** over 3G and Wi-Fi.
- **Browse sources from music collections** by album, artist, genre, song and playlists or internet radio stations (*Wi-Fi connection only*).
- **Control lights** through keypads, individual lighting pages or tasks.
- **View and monitor IP cameras.**
- **Set and view temperature** and modes for all climate zones.
- **Manage shades, video, security, theaters and more.**
- Place the preferred audio zones, lights, keypads, cameras, thermostats and scenes **in a “Favorites” list**.
- New features and services available with **automatic updates**.

Control Everything through your iPad!

Independence in lighting control...

Simply touch the screen to set lighting levels, whole-home scenes and room temperatures. The ability to view multiple pages gives you the flexibility to control as many lights as you need to have complete access to your home.

Be calm and Safe...

Quickly view surveillance cameras to ensure family and property safety in real time while you're away. If you're at home and far from the door, glance to see who is visiting or check the kids in the pool to provide an extra measure of safety and convenience.

Multiroom – So much fun!

Browse and search Vantage music collections with natural flick gestures. Scroll through albums, artists, genres, playlists and internet radio stations, as well as see what each room is playing and change sources.

Envisioning The Future

ACOUSTIC DESIGN is a Greek innovative company based in Athens, Greece and that has been specialized in the design and construction of dedicated home cinemas, TV studios, conference rooms since 2000.

The company has also been installing Hi – End Automation since 2004, focusing on quality, detail and high aesthetic design.

Combined with the second company in the group, **ADVANCED INTEGRATION**, **ACOUSTIC DESIGN** has managed to establish itself in the Integration sector, setting the standard for the Greek, as well as the European market.

In **ACOUSTIC DESIGN | ADVANCED INTEGRATION**, our goal is to provide specialized and integrated solutions using the most reliable and technologically advanced products in the world.
